Dear Hank and Walt,

On behalf of the University of North Carolina at Charlotte Mechanical Engineering Thermal/Fluids Design class, I would like to thank you for your time during our project presentations and especially for Hank's presentation during the last class of the term.

Your presence was greatly appreciated by the students, me and the Chair of our department, Jay Raja. I gave a survey during the last class and many students indicated how much they thought your involvement helped to make the class more realistic and served as a reality check.

I hope that you will continue to enjoy being involved in helping to educate our future engineers.

Once again, thank you for your support.

Sincerely,
